# BIOMETRIC

SMS 2.0 Qmlativ

*Students can be identified in as little as 2 seconds.*

When a finger is placed on this device varying types of measurements are put into an algorithm. This algorithm turns it into a long number that is then tied to the Skyward ID account.

Fingerprints are ***NOT*** stored and are unable to be recreated from the number. The system retains only a piece of the measurements and cannot be decoded. It can only connect the number with the ID while the finger is placed on the device.

Stores up to 10 fingers for one individual per ID.

Designed as an accessory to any windows based product that prompts for ID numbers or names.

**BioConnect Finger ID Package**
Biometric finger reader

- Windows compatible
- USB connection
- Skyward Module
- Eliminates need for ID cards or PIN numbers
- Accurate and secure
- Warranty - 1 year depot level

BIO | **$1295**

**Feedback Light System**
Optional with Biometric finger reader

- USB connection
- Self-powered
- Quick recognition in high-noise environments
- Visual recognition for hearing impaired
- Excellent on/off contrast
- 2 meter cable

BIO-LT | **$125**

# CASH DRAWERS

**Automatic Cash Drawer**

# Food Service Protective Solutions

*Keep your cafeteria safer and provide peace of mind with these solutions to minimize contamination in your food service lines.*

## POS Shield

A protective barrier placed between the cashier and customer limiting the spread of germs.

- Durable steel frame and plexiglass shield construction
- Sturdy base plate with no countertop mounting or drilling required
- Easy to install and relocate for future use
- Ideally sized for one cashier (30” wide x 33” tall)
- Adjustable gap between guard and countertop enables safe passing and scanning of products
- Payment pinpad terminals may be mounted to pole

**POS Shield | POS-S** **$143**

## Keypad Cover

Plastic covers can be placed over our Raised Keypad device, Auto-Queue (KP-AQ). They can easily be taken on and off to replace and disinfect on a regular basis.

**Auto-Queue Keypad Cover | KPC-AQ** **$15**

# Ways to minimize contamination with Keypads, Barcode Scanners, and Biometric Readers

## Keypads

While we do not have covers for our Mini Terminal Keypads, they have a smooth surface that is easy to wipe down frequently. Our Mini Terminal Keypads can also be purchased with a built in infrared barcode scanner that would allow for touch free scanning of a barcoded ID.

### *Recommendations for cleaning:*

With a soft cloth or paper towel use 70% Isopropyl rubbing alcohol to wipe your device clean. Lysol or Clorox disinfectant wipes can be used as well.

## Barcode Scanners

With a stand and programmed to auto-scan, barcode scanners can create a touch-less experience for both food service staff and customers.

## Biometric Readers

Having just one small area each customer touches makes these devices easy to wipe down quickly and frequently. Place hand sanitizer next to the device for customers to use before and after to assist in limiting contamination.

### *Recommendations for cleaning:*

With a soft cloth, using any of the solutions mentioned above, dampen the cloth to wipe the sensor clean. Make sure the cloth is not wet, if the sensor becomes saturated it will get damaged. It is important to use a soft cloth as well to ensure the sensor is not scratched.
